

The ABCkeyboard – For first time users

- Computer keyboard beginners immediately grasp the alphabetical layout
- They don't waste time learning the typewriter's QWERTY keyboard layout.
- Increased *speed,creativity and confidence* are the results

One alphabet or two ?

Is learning one alphabet easier than learning two? The QWERTY keyboard has a disordered "second alphabet." Will a first time user make better progress without that extra complication? Isn't the alphabet a much broader lifetime skill that works well on keyboards too? **Yes, yes, and yes!**

QWERTY v The alphabet

Better technology is replacing QWERTY- why learn it? Many beginners find QWERTY difficult, but we all know the alphabet. You will find computers much easier with keyboards laid out with the alphabet's **A B C D E F G**

ABCkeyboard users :

just start typing faster! Much faster! Seniors, professionals and children see their productivity go through the roof at home, school or the office. - and they can use the ABCkeyboard for as long as computers still need keyboards.

To Order:

Each ABCkeyboard comes complete & ready to go for **£20** plus **£5** shipping
Call: 0800 107 7920

Many have two ABCkeyboards -one at home & one at the office

The ABCkeyboard™ CE FC

Advantages of the ABCkeyboard™

- Easier A-Z layout (not the awkward QWERTY of 1867 !)
- Easy to read Alphanumeric keys (normal size available)
- Numeric keypad is numeric only - no numlock accidents!
- No Caps lock accidents -requires the shift key too
- No Overwrite accidents - Insert requires the shift tool
- Euro and Sterling currency symbols
- PS/2 Interface (ie. connector) - the most widely used
- Compatible with all personal computers
- Works with all popular PC operating systems.

The sensible, alphabetic, A-Z keyboard we've been waiting for!
Have one at home, and one at the office!
